ADA Phones Building & Line Powered

S3 Communicator Key Features

Line Sharing

Allows the sharing of a single telephone line between multiple S3 Communicators while retaining the ability to have each phone call its own number. Call into the group and isolate one phone or talk to the entire group.

Intercom/Phone combo

Allows the emergency phone and intercom to utilize the same set of phone lines. The S3 Communicator can also be configured to act primarily as an emergency telephone, but convert to an intercom to allow communication between the machine room and car.

Onboard Keypad for easy programming

Program the phone without being connected to a phone line. Once connected to a line, calls can be placed using the keypad and programming is made simple by one-touch buttons to access the programming menu.

Features	Key	
	Line	Building Feature
Programmable volume control	•	•
Digital message recording with excellent clarity	•	•
Second set of push button contacts	•	•
Auto answering	•	•
Programmable with a 9V battery; no need for handset or telephone line	•	•
Resetting fuses to protect phone	•	•
Programming options via easy to understand voice prompts	•	•
Continuous internal maintenance functions to check battery, telephone line and phone test reminder and trigger alarm upon failure	•	•
Remote diagnostics to check speaker and microphone functions	•	•
Shortcut program buttons available: SITE ID; PRG MENU; PH NO; VOLUME	•	•

ADA Phones Phone Line Powered

AS-3 Series

AS-3 series phone is a micro-controller based emergency phone system that offers a wide range of features and system functions to meet your needs, and is **100% ADA compliant**.

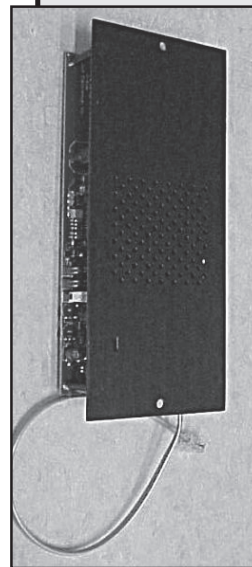

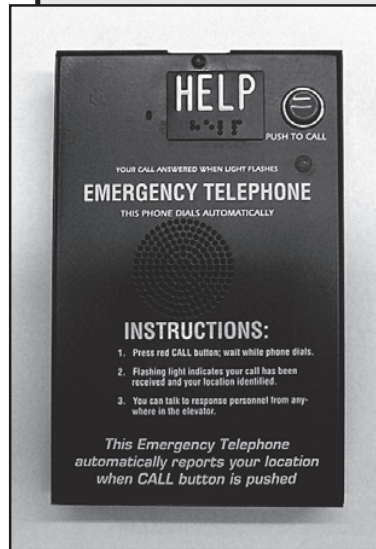

The AS-3 is attractively designed and is available as either a flush-mount or a surface-mount version. Finish selections include stainless-steel, brass or chip-resistant powder coating. A vandal-proof version is also available.

Applications

The AS-3 is used in a wide range of elevator and other applications including parking garages, university campuses, shopping malls, airports, hospitals, and many more.

Functions & Features

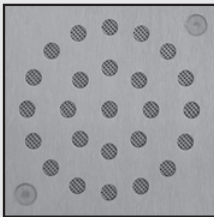

- Two-number dialer
- User-recordable digital message for location identification.
- Voice prompted call handling instructions.
- PBX system compatibility
- Remote and local programming allows all system functions to be reprogrammed from central and local locations, including message recording.
- Tone dialing.
- Light flashes automatically when call is received.
- Auto-Answer mode allows incoming calls.
- 5-digit access code allows security against unauthorized reprogramming
- Auto disconnect
- Prank calls easily disconnected.
- Non-volatile memory circuits allow voice message, telephone number, and programmed information to be retained without any batteries or power for up to 10 years. That means no batteries to replace and no AC power needed!

Part Number	Description	Dimensions
